

Britox Plus

High strength descaler, concrete and rust remover

BRITOX PLUS is a highly concentrated hydrochloric acid based cleaner which removes the toughest deposits of limescale, mortar, concrete and rust deposits from ferrous metal surfaces.

Advantages

- ▲ Highly concentrated acidic product for rapidly removing the toughest deposits
- ▲ Excellent trade brick acid and routine cleaning of concrete mixers, also removes algae, scum and general soiling from swimming pools
- ▲ Concentrated performance
- ▲ Suitable for use in the building trade, plant hire, tool hire and further maintenance environments
- ▲ High concentration and special wetting agents help reduce clean up time and labour with minimal usage
- ▲ Heavy duty performance

Typical applications

- ▲ Construction and Plant Hire. Removal of concrete, mortar and plaster from mobile and static equipment, scaffolding, scaffolding clips and brickwork
- ▲ Removal of rust and mineral scale from equipment and manufactured components
- ▲ Mechanical Maintenance Removal of rust from equipment and components
- ▲ Building Maintenance Cleaning brickwork, concrete surfaces and tiles
- ▲ Leisure Centres Removes residues of scale and body fat from around the water line of swimming pools

Application instructions

Use only in well-ventilated areas and avoid atomising the product. Typically Britox Plus will be applied diluted at up to 1:8 in water. Apply to surfaces and allow to penetrate rust mortar or scale deposits. Agitate periodically and rinse with clean water. Repeat process as required. Do not apply to or in close proximity to stainless steel.

For dipping of components use a tank constructed from an acid resistant material such as HDPE. It is recommended that the tank should be fitted with a lid. Use Britox Plus diluted at up to 1:10 in water. Allow components to soak, agitate when required and rinse thoroughly with clean water.

Metal alloys can be sensitive to acidic materials, always check for material compatibility prior to full scale application. Following application metal surfaces may require application of a corrosion preventative such as Arrow Shield NF.

Britox Plus

C027

High strength descaler, concrete and rust remover

Technical data

APPEARANCE	Liquid
COLOUR	Light red/brown
ODOUR	Acidic
SOLUBILITY	Completely soluble in water
pH-VALUE, CONC.	1
SHELF LIFE	4 years
COMMODITY CODE	28061000
PACK SIZES	5 litre 20 litre

Health and safety, storage and precautions

Refer to Safety Data Sheet (available on request)

Rust Remover

Mild rust and scale remover.

System Descaler

Specifically formulated for the rapid removal of scale, oxidation and rust from both ferrous and most types of non-ferrous metals and alloys.

Shield NF

Non Flammable corrosion preventative, de-waterer and light lubricant.
