CLEANING & MAINTENANCE
SOLUTIONS

Arrow Solutions has been supplying janitorial products since our inception in 1968.

Schools, hospitals, restaurants and hotels around the world rely on Arrow Solutions' products to maintain a safe and clean environment for staff and customers alike.

With our award-winning aerosols and liquids, we deliver exceptional products and outstanding service – Arrow Solutions has the answer, whether your stains, odours and blockages are on a small or a large scale.

Our trained staff work closely with customers to meet ever-tightening regulations, identify best practice, and save costs, from using the right product for the job through to creating bespoke cleaning schedules.

THE STORIES BEHIND OUR COMMERCIAL HYGIENE SUCCESS

Arrow Solutions is committed to a firmly client-focused approach. Your experience with our products and services is the true measure of our success.

We value communication with our clients, working closely with them to identify commercial hygiene issues and take measures

to provide a bespoke solution. The following case studies are just a few examples of our clients who came to Arrow Solutions to fulfil their requests and were satisfied by the results of our work.

If you want to learn more about our successes in tackling commercial hygiene concerns, visit our website at arrowchem.com

"I would recommend Arrow Solutions to anyone looking for expert, friendly advice on the use of cleaning chemicals in their establishment, kitchen or business."

June Hayes Catering Manager,
University of Strathclyde Glasgow

ARROW SOLUTIONS PROVIDES DIRECTION ON CHEMICAL EFFICIENCY AND SAFETY

University of Strathclyde is a leading international technological centre for higher education, located in the heart of Glasgow, Scotland's biggest city. Arrow Solutions have been doing business with Strathclyde for many years, working with them as a key supplier to meet the challenges that a growing business must face.

To ensure the safety of their students and to meet CoSHH health & safety standards, they needed expert advice on the handling of Arrow Solutions' Kitchen Range of products. The university also considered it important to reduce their chemical spend, ensuring that their growth would not result in inefficiency.

Arrow Solutions worked closely alongside the University of Strathclyde to address their needs, holding two on-site sessions for CoSHH training to provide their staff with expert instruction. The staff were consulted on how to yield the best results and adhere to the highest safety and environmental standards.

Arrow Solutions continue to supply the university with innovative ways of reducing chemical spend, whilst improving performance. The relevant staff are also trained sufficiently in the use of their chemical cleaning solutions. With the knowledge we have shared, University of Strathclyde has minimised the amount of chemicals needed to efficiently and safely run their catering and cleaning operations.

"[We have] found that the drain issues we were suffering from previously, have been greatly reduced. We have always worked closely with Arrow Solutions to find the best solutions for our business and this product is outstanding."

Sarah Bullen Office Manager,
Caviar House & Prunier (Heathrow Airport)

CAVIAR HOUSE & PRUNIER

CREATORS OF FINE GASTRONOMY

DC2 COMBATS BLOCKAGES AND WASHES AWAY DRAINAGE ISSUES FROM TOP AIRPORT RESTAURANT

Caviar House & Prunier produce the world's finest Prunier caviar and Balik smoked salmon for their worldwide seafood bars. When they found themselves experiencing blocked drains on a regular basis at their Heathrow Terminal 2 site, they approached Arrow Solutions for expert advice.

In response, Arrow Solutions installed dosing units with DC2 Gladiator, a revolutionary and unique drain grease and odour control system. Gladiator neutralised the drainage issues by rapidly softening and liquefying fatty deposits, allowing them to be easily washed away without redepositing.

"The product is of an exceptional quality and very reliable. It has a quick reaction time and leaves no marks or stains on the machine, unlike other rival manufacturer products."

Simon ww Director,
Kestrel Catering & Service Maintenance

KESTREL – CATERING AND SERVICE
MAINTENANCE COMPANY

KR7 SPEEDS UP CLEANING AND SERVICE PROCESS WITH MINIMAL EFFORT

Kestrel work in service and maintenance of coffee machines, dishwashers, and other catering appliances, but they were lacking an effective coffee machine cleaner and descaler that could be used across their commercial equipment.

To meet their needs, Arrow Solutions designed and manufactured a specialist cleaning solution to ensure not only a cleaner machine, but also one free from scale. KR7 Coffee Machine Cleaner & Descaler could also be applied to other commercial equipment in Kestrel's range. This resulted in drastically improved reliability across their products, and less need for maintenance and repair.
