

ARROW'S DYNAMIC DUO DELIVERS UNMATCHED CLEANLINESS

In 1967, the wholesale Bramfield Meats business was established on a four-acre site on the edge of the village of Bramfield, Suffolk. With over 50 dedicated staff based at their Low Road butchery, Bramfield Meats' success is very much down to the hard work and support of the loyal team, many of whom have worked with the family for decades.

After discovering Arrow Solutions online, Bramfield Meats required a product to clean stainless steel surfaces on machinery, as well as food-safe disinfectant. Existing products were not cleaning effectively, so they turned to Arrow and began to use Sodaklenz and Germfree FAB, which have since yielded impressive results.

Sodaklenz has been developed to meet the need for a heavy-duty product for the rapid removal of grease, oil, dirt, and carbon deposits from components and equipment. It is a low-foam product that is proven to perform in food manufacturing and processing for removing baked-on and carbonised food residues. Germfree FAB is a food-safe (NSF approved) biocidal cleaner and terminal sanitiser for the removal of food residues from food preparation surfaces and equipment.

Bramfield Meats has now been an Arrow Solutions customer for a year, and they continue to use our products whilst being very happy with the results and service provided.

"We have been using Sodaklenz and Germfree FAB for over a year now and we couldn't be happier with the outcomes. The cleaning and disinfecting ability of these products far surpasses anything we had used previously. Our machinery and surfaces are coming sparkling clean, allowing us to maintain the highest sanitation standards for our meats."

Just as importantly, Arrow's customer service has been exceptional. Any question or request we've had has been handled promptly and satisfactorily. We look forward to continuing our relationship with Arrow Solutions for years to come."
