

CUTTING EDGE CLEANING TO SUPPORT SOLUTEX'S PRODUCT RANGE

Solutex Ltd. is a leading supplier of recycling equipment for solvent and water, waste compactors, drum crushers, parts and spray gun washers. The company has many years of experience supplying equipment into multiple industries across the world, and its ability to provide unique specialist designs and work closely with customers has strengthened its position as a market leading business.

Previously, the company had been using three different products for cleaning, but eventually decided to switch to Aquaklenz CP from Arrow Solutions, which it has now been using for three years. Aquaklenz CP is a low foaming detergent for use in parts washers, rotating spray wash cabinets and tunnel washers, and Solutex Ltd. feels that this product combines the abilities of their previous three cleaning products, therefore providing great cost-in-use savings, and its ability to remove grease and oil is unmatched on the market. on a consistent basis to keep their facilities in optimum condition.

"Solutex continues to use Aquaklenz CP due to its consistent reliability and outstanding performance.

Aquaklenz CP complements our parts washer equipment range by effectively cleaning components to a high standard of cleanliness and ensuring optimal operational efficiency. Its superior formula tackles tough residues with ease, which gives us peace of mind that our customers are completely satisfied. We value our partnership with Arrow Solutions and trust in their innovative products to support our own products."
